

# THE FUTURE OF GAUGES IS HERE

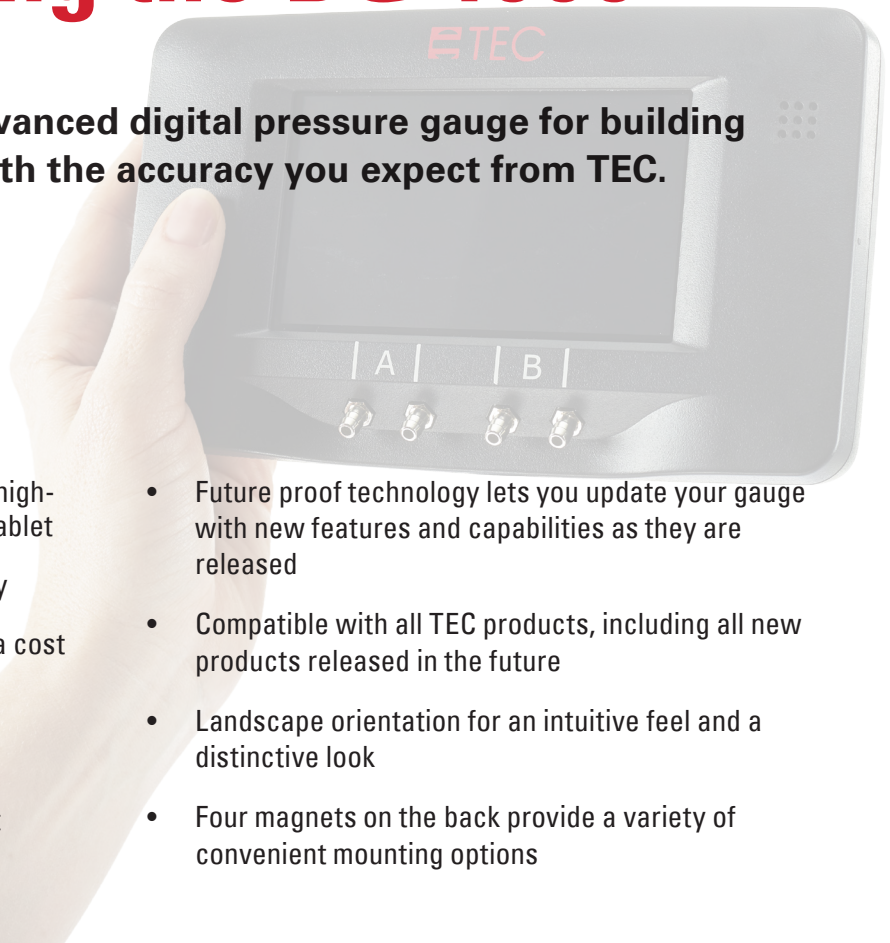

## Introducing the DG-1000

The DG-1000 is the most advanced digital pressure gauge for building performance testing with the accuracy you expect from TEC.

### Features Include

- Responsive capacitive touch screen provides high-end performance, similar to a smartphone or tablet
- Bright, full color screen for superior readability
- Built in Wi-Fi is available in all units at no extra cost
- Built in USB, micro USB and Ethernet ports
- Field replaceable, rechargeable batteries
- Powerful micro-processor with a custom-built operating system
- Future proof technology lets you update your gauge with new features and capabilities as they are released
- Compatible with all TEC products, including all new products released in the future
- Landscape orientation for an intuitive feel and a distinctive look
- Four magnets on the back provide a variety of convenient mounting options

# ETEC
